

Employers must ensure that each affected employee uses protective footwear when working in areas where there is a danger of foot injuries due to falling or rolling objects, or objects piercing the sole, and where such employees' feet are exposed to electrical hazards.

◆ A352-2XL	347602841	Disposable booties, 12"	2XL	Pr	\$7.40

### fyi. Foot Protection

Foot protection shields the feet and toes during exposure to situations where the potential for foot injuries exists. Hazards include falling or rolling objects, chemical or liquid exposures, piercing objects through the sole or uppers, and/or exposure to electrical hazards.

Choosing footwear with the proper chemical and weather resistance reduces the chances of chemical burns, skin irritation and exposure. Select sole patterns based on the work application by looking at both the tread pattern and the sides of the sole to see how easily debris can be pushed out of the channels. Footwear constructed to meet ANSI/ASTM standards can help prevent injuries from falling and rolling objects.

For more information on these OSHA standards and others, visit [www.osha.gov](http://www.osha.gov)
